

 <p>Repeats the code inside this block until a condition is met</p>	 <p>Moves 10 steps to the right</p>	 <p>Moves 10 steps to the left</p>
 <p>The sprite is standing straight</p>	 <p>Repeats the code inside this block forever and ever and ever and ever...</p>	 <p>What is written in this block is what the program is supposed to do when properly ordered. You can put it aside. <i><u>THIS IS THE BIGGEST HINT!</u></i></p>
 <p>For a sprite, changes their <u>appearance</u> (to combat ready)</p>	 <p><u>Think of messages as cues</u>. The code sends a signal, and does something when the signal is received...</p>	 <p>Switches the background</p>
<p>THE REST IS EASY! JUST READ IT LIKE ENGLISH AND YOU'LL UNDERSTAND WHAT IT'S GOING TO DO! YOU GOT THIS! :)</p>
